

Draft Version

Würzburg, March 27, 2026

Indications for written assignments¹

1. Cover sheet

Please indicate the following information on your cover sheet: title of your paper, date of submission, the supervising lecturer(s), the Professorship for Adult and Continuing Education, the seminar title, your semester, your own data (full name, address, telephone number, email address, student ID number, subject of studies, and your study semester).

2. Formatting

Before submitting a written paper, please familiarise yourself with the functions of a text processing program. You can use self-study online courses or participate in seminars offered by the University of Würzburg's Information Technology Centre.

Please use the following formatting styles consistently throughout your paper:

- Font size: Arial 11pt. or Times New Roman 12pt.
- Margin: left, right, top, and bottom: 1 inch or 2,54 cm
- Line spacing: 1,5
- Full justification and hyphenation

Page numbering begins with the introduction. Please use the functions of your text processing program (e.g., Word) accordingly (e.g., section break -> do not link header and footer to previous section).

Please familiarise yourself with how to simplify this guideline using the specific functions of your text processing program.

The tables of contents, tables of figures, list of tables, etc., can be created using the corresponding functions of your word processing program (e.g., Word). Please use style sheets (e.g., "Heading 1") to generate the table of contents automatically (e.g., Document elements -> Table of contents).

The introduction, main body, and conclusion are numbered in the outline. The list of abbreviations, list of tables and figures, bibliography, declaration of originality, and appendix are not numbered. Appendices are structured

¹ This paper has been translated from the German original text into English with AI-based translation tools. It has been further adapted by the author, also with the support of AI-based tools.

using capital letters (e.g., "Appendix A," "Appendix B," etc.). Please ensure you can submit one continuous document only in PDF format at the online Moodle course WueCampus.

You can only upload one PDF file AND a single Word document to WueCampus for electronic submission. Please ensure that you can combine multiple files into a single PDF file and a single Word document. The university's information technology centre provides you with software via StudiSoft (for example, Adobe Acrobat Pro) and also offers various courses in the course store. Please attend these if you are not yet confident using the relevant software.

3. Gender-appropriate use of language

Please consider how you formulate your texts with gender-neutral language in mind. You can find the latest information, including guidelines from the University of Würzburg, on the following website: https://www.uni-wuerzburg.de/fileadmin/33120300/Pruefungsamt/Formulare/Allgemeine_Formulare/Versicherung_zur_Leistungserbringung/20231127_Declaration_of_authorship.pdf

Information in English are provided by University of Hannover: <https://www.chancenvielfalt.uni-hannover.de/en/chancengleichheit/geschlechter-und-diversitaetsgerechte-sprache/gender-sensitive-language>

4. Usage of foreign words

Please make sure that you are using foreign words correctly. If you are unsure about their usage, please look them up in special dictionaries or lexicons.

5. Citation and bibliography

Citations should be consistent. Use a citation style (e.g., APA, DGPs, Harvard). Please observe the relevant rules of academic work (citation, references, etc.) and be sure to attend the Writing Centre courses if you are not yet familiar with them.

You can cite lectures as follows, for example:

- In the text: (cf. Moos 2014)
- In the bibliography: Moos, S. (2014): Die VHS Würzburg als pädagogische Institution (The Würzburg Adult Education Center as an educational institution). The lecture was given on June 17, 2014, during a field visit.

You can cite websites as follows, for example:

- In the text: (cf. VHS Würzburg 2014)
- In the bibliography: VHS Würzburg (2014): Our program. Accessed on June 18, 2014. Available at <https://www.vhs-wuerzburg.info/programm>

Information brochures/flyers can be cited as follows, for example:

- In the text: (cf. VHS Würzburg 2013)
- In the bibliography: VHS Würzburg (2013): VHS Guide. Flyer.

If you have several references from the same author and the same year, sort them in lowercase letters according to the year, ensuring that the text and bibliography correspond. For example: VHS 2014a and VHS 2014b.

6. Use of artificial intelligence

General information on the use of AI tools

We have noticed an increasing use of chatbots by students at the Professorship for Adult and Continuing Education. Please be aware that chatbots often do not produce the desired result. For example, you may receive a paraphrase rather than a literal translation. Or you may receive a reworded text rather than a purely grammatical correction of your text.

We recommend using AI tools for spell- and grammar-checking. However, please note that chatbots are not suitable for spell- and grammar-checking, as they reduce the accuracy of your text and often distort its content.

Please state explicitly if you have not used AI to produce your written examination paper.

Please note

- 1.) that you only use chatbots in the manner described below,
- 2.) that you have to declare the use of AI in the declaration of authorship,
- 3.) that you have to place quotation marks around any text taken verbatim from chatbots or paraphrasing tools (e.g. Grammarly AI Assistant, Quillbot's 'Rewrite Text' function) (see below for details),
- 4.) that you have to submit a comprehensive AI declaration (see details below),
- 5.) that you have to include links to the chat histories in the AI declaration.

It is important that you work in a highly structured manner with chatbots and other AI tools in order to meet the requirements for academic work. The use of chatbots in exam submissions is only permitted at the Professorship for Adult and Continuing Education if these conditions are met. The use of artificial intelligence is permitted only if the duty of care required in academic work is strictly observed. However, this necessitates full transparency, which must be provided in an AI declaration attached to the work. The use of AI tools is strictly prohibited if it distorts your own work. Please note that all texts will be checked for AI use.

A requirement for each exam submission is the processing of a question or topic that has been independently thought through by the students and refers to relevant scientific knowledge (e.g., theories, empirical findings). To this end, you must study scholarly texts, critically classify them, and cite them. It must be ensured at all times that the students' work is guaranteed in the argumentation, analysis, and conclusion. AI tools can only be used for support. Control over your assessment performance's content, questions, and argumentation must remain with the students. This means that the requirements for assessment performance always go beyond what AI tools are capable of.

Types of AI tool usage

When developing questions or conducting literature research, chatbots can be used for initial brainstorming at most. Please be aware that chatbots often provide imprecise, superficial, or incorrect answers unsuitable for academic work. If you want to use the answers provided by a chatbot, you must always check them for academic usability: What is the source of the statement? Is the source a reference that you can use for scholarly work? Can you verify the chatbot's statement in the source? If so, continue working with the original source, not the chatbot's results. Your exam performance is always based on an in-depth study of academic texts.

If you use chatbots to structure your assessment, you have to save the chat histories and submit the links to them as part of your assessment. To do this, create one or more separate communication channels for each individual assessment or chapter. Without the chatbot link, the assessment will be marked as failed. If you use

the structuring results of a chatbot directly for your examination work, you have to mark these with quotation marks ("...") and cite your sources. It is also necessary to include the original texts and translations in footnotes when using AI for translations (PDF and Word documents). Chatbots are unsuitable for grammar or spelling corrections. Please note that it is strictly prohibited to feed data (e.g., PowerPoint slides from seminar leaders or fellow students, interview data, scientific texts) into AI databases without obtaining the appropriate consent. Please be aware that no lecturer at the Professorship for Adult and Continuing Education will allow you to upload seminar materials to a chatbot.

If you use chatbots for an initial brainstorming session, you must carefully check the sources of the chatbots' responses. You should then use the original sources to support the arguments in your essays.

Permitted and non-permitted uses of AI tools

The use of AI tools in the preparation of your exam papers is **permitted for the following steps**:

- Research: AI tools can be used as an initial research tool. However, original scholarly sources must be re-searched and studied to gain a deep understanding of the topic.
- Language support: Checking spelling, sentence structure, and grammar. Please attach the original texts as a digital appendix if you use the AI tool for a comprehensive syntax check. Please note that linguistic proficiency is a key skill for educators. **To pass examinations at the Professorship for Adult and Continuing Education, you have to be able to formulate texts independently in the relevant examination language.** Linguistic assistance that goes beyond checking grammar (e.g. 'rewriting texts', 'rephrasing texts for clarification or greater clarity') is not permitted.
- Translation: The translation of parts or entire texts into another language. If your text contains translations spanning several sentences, the original text must be cited in a footnote. AI translations should generally only be used for quotations from other authors. **The Professorship for Adult and Continuing Education, as well as your future employers, expect you to be able to formulate your examination work in the relevant examination language yourself.** Formatting of bibliographies: You can use only texts you have studied for this purpose. After formatting, it is essential to check that all references have been created correctly.

The use of AI tools in the preparation of your exam work is **NOT permitted for the following steps**:

- Automatic creation of texts: The automatic creation of texts (e.g., PowerPoint slides, portfolios, seminar papers) is not permitted. Assessment work is always based on the intensive study of scholarly texts and your ability to develop argumentative conclusions.
- Unchecked and unreflective adoption of answers from chatbots: You can use chatbots for brainstorming and idea generation. However, it is not permitted to copy answers from chatbots into seminar papers without citation (quotation marks and references).
- Writing fictitious sources: All sources listed in the bibliography must be critically studied by students. Please save all sources so you can present them to the lecturer if any queries occur.
- Creation or falsification of data (e.g., interview data)
- Lack of transparency in the use of AI: Only AI tools listed in your AI declaration are allowed. Paraphrasing scholarly texts with the help of AI tools for your assessment performance is not permitted.
- Answers from AI tools as sources: If you use answers literally in your exam work, you must mark them with quotation marks. However, answers from AI tools do not have the value as statements from scholarly texts and therefore cannot be used as evidence for your scientific argumentation.

Declaration on the use of AI tools

If you use AI tools for your assessment work (both oral and written), you must include an AI declaration explaining which AI tools you have used and how. When using AI tools for idea generation, text research, translation, or extensive sentence rephrasing, it is necessary to submit the chat logs as a digital attachment. The AI declarations could look like this, for example:

AI tool	Version	Type of application
Chat GPT	Version 3	Brainstorming: URL to the chat history Structuring the seminar paper: URL to the chat history ➔ Please do not use chatbots to translate text, as there is a risk of free paraphrasing. ➔ Please do not use chatbots for spelling and grammar checks, as there is a risk of free paraphrasing.
DeepL	Free Version	Translation of parts of the work from Italian into English Translation notes: see footnotes in the text
QuillBot	Free Version	Spelling and grammar check Details: see footnotes in the text ➔ Please do not use the ‘Rewrite text’ function in QuillBot . This function paraphrases your text and does not constitute a grammar check. There is a risk that the precision required for academic texts will be lost. ➔ Should you nevertheless use QuillBot for paraphrasing in exceptional cases, the paraphrase must be marked within the text (see below for details on how to mark it).
Grammarly	Free Version	Spelling and grammar check Details: see footnotes in the text ➔ Please do not use functions such as “rewrite for clarity” or “make more detailed” in the AI writing assistant. These functions generate paraphrases of your text. There is a risk that the necessary precision will be lost. ➔ Should you nevertheless use Grammarly for paraphrasing in exceptional cases, the paraphrase must be marked in the text (see below for details on how to mark it).
Microsoft Copilot	Free Version	Formatting the references according to APA 7
Microsoft Word	2019	Orthographic check
Citavi	7	Summaries for checking the relevance of texts for examination performance
MaxQDA	Transcription	Transcription of interview data with the consent of the interviewees (documentation in the declaration of consent)

Examples of how to acknowledge the use of AI

→ AI-generated paraphrases must always be placed in quotation marks!

Although we recommend that you not use chatbots for spelling and grammar checking, there may be exceptions where this is necessary. If you use chatbots or other AI tools that rephrase text and use the responses (largely) verbatim in your work, cite the AI's output as follows: "This text has been revised using an AI-based language assistance system."² In the footnote, state which prompt you used with which AI tool and what your original input was.

Please note that requests for rewriting, stylistic adaptation or summarisation constitute AI-generated text. Please mark AI-generated paraphrases as such and provide details in the footnotes. This simplifies the assessment process and enables us to evaluate your work in a way that reflects your intentions, as it gives us a better understanding of your academic performance.

Please note that it is important for a sentence to convey precisely what you wish to communicate. Please avoid AI-assisted paraphrasing as far as possible. It is not necessary for your written work to sound like 'polished AI wording'. Rather, we assess the quality and precision of your arguments.

→ Notes on spell-checking and grammar checking

We recommend that you do not use generative chatbots for spelling and grammar checking. Instead, it is advisable to use AI tools that allow you to specify exactly what type of editing you wish to apply. Please disable any generative functions that allow you to rewrite or rephrase text. There is a risk here that you will end up with text in an AI-generated style, which could compromise the accuracy of your arguments. Instead, we recommend using only the spelling and grammar correction features. If you want to ensure you do not make any mistakes, we recommend including the original text in a footnote.

Here is an example of how Copilot rephrases a text when only a grammar check has been requested: "Please state which AI tool you used and what your original input was." We recommend that you do not use generative chatbots for spelling and grammar checks. Instead, you should use AI tools that allow you to specifically select the type of revision to be carried out. Please disable generative functions that offer text rewriting or restructuring. Otherwise, there is a risk that the text will take on a style typical of AI, compromising the accuracy of your statements. If you wish to ensure that no errors occur, we recommend including the original text in a footnote."³

→ Guidelines on the labelling of translations

In order to pass the examination, we and employers expect you to be able to compose texts in the relevant examination language yourself. Translating entire texts from your native language into the examination language is not permitted. However, this does not preclude you from using AI tools to translate individual complex sentences or technical terms. Please only use generative chatbots for translating texts in exceptional cases. Instead, we recommend using translation tools such as DeepL or Google Translate to ensure you obtain accurate and literal translations.

² Paraphrasing using Copilot. Prompt: "Please rephrase the following sentence to make it sound academic: This text has been rephrased using a chatbot." URL: [please insert the link to the chat history]

³ Paraphrasing using Copilot. Prompt: "Please check whether the following sentence is grammatically correct: We recommend that you do not use generative chatbots for spell-checking and grammar checking. Instead, it is advisable to use AI tools that allow you to specifically choose the type of editing you wish to apply. Please disable any generative functions that offer to rewrite or rephrase your text. There is a risk here that you will receive texts in an AI-generated style, which may compromise the precision of your statements. If you want to ensure you do not make any mistakes here, we recommend that you enter the original text in the footnote." URL: [please insert the link to the chat history]

If you use passages from other authors as quotations in your own work, you should cite them as follows:

“The principles outlined for anti-racist organisational development in educational institutions are characterised by a complexity that challenges not only linear knowledge repositories and one-dimensional ways of perceiving the world, but also a form of solidarity that perpetuates power structures. As demonstrated in this article, the mechanisms of entanglement described are also reflected in formal and non-formal educational institutions and contribute to the persistence of racialised exclusions.” (Danquah/Egetenmeyer 2025, p. 230, translated from German with DeepL)⁴

When you make changes to the AI translation, instead of writing “translated from German using DeepL”, you might write “translated from German with support of DeepL”. In the footnote, you can specify whether you have simply checked individual words or made more extensive changes to the text:

“The principles outlined for anti-racist organisational development in educational institutions are characterised by a complexity that challenges not only linear knowledge repositories and one-dimensional ways of perceiving the world. They also show a form of solidarity that perpetuates power structures. As demonstrated in this paper, the mechanisms of entanglement identified are also reflected in formal and non-formal educational institutions and contribute to the persistence of racialised exclusions.” (Danquah/Egetenmeyer 2025, p. 230, translated from German with support of DeepL)⁵

If you are translating a text you have written in another language into the language of the examination, please include the original text in a footnote. If you are doing this not just for individual sentences but for the entire paragraph, you can insert the footnote at the end of each paragraph.⁶

As AI translation tools that comply with data protection regulations do not provide links for sharing, it is necessary to include the original texts in the footnotes when translating.

7. Declaration of Authorship

Please note that we can only evaluate your work if you include a signed Declaration of Authorship. This will not be requested at a later date. **Without a Declaration of Authorship, your work will be considered “not submitted.”** For digital submissions on WueCampus, please attach a scan of the handwritten, signed Declaration of Authorship to your electronic version. For printed submissions, a handwritten signature (wet ink) is required. For paper submissions, scanned, photocopied or digitally scanned signatures cannot be accepted. Please note that **the digital AND printed versions** must be submitted to the Professorship for Adult and Continuing Education by the deadline. Please note that your exam will be considered “not submitted” if you submit it incompletely or after the deadline.

Please use the current Declaration of Authorship from the Examination Office. You can find this under the heading “Declaration of Authorship (theses/papers)” here: <https://www.uni-wuerzburg.de/en/studying-at-jmu/examination-office/forms/>

⁴ This text was translated from English using DeepL. Original text: „Die dargelegten Prinzipien einer rassismuskritischen Organisationsentwicklung für Bildungseinrichtungen weisen eine Vielschichtigkeit auf, die sowohl an linearen Wissensarchiven sowie eindimensionalen Wahrnehmungsmöglichkeiten als auch an einer machtreproduzierenden Solidarität rüttelt. Die beschriebenen Verwicklungsmechanismen spiegeln sich, wie im Beitrag aufgezeigt, auch in formalen und non formalen Bildungseinrichtungen wider und tragen zu einem Fortbestand rassialisierender Ausschlüsse bei.“ (Danquah/Egetenmeyer 2025, p. 230)

⁵ This text was translated from English using DeepL and has been amended in two places by the author. Original text: „Die dargelegten Prinzipien einer rassismuskritischen Organisationsentwicklung für Bildungseinrichtungen weisen eine Vielschichtigkeit auf, die sowohl an linearen Wissensarchiven sowie eindimensionalen Wahrnehmungsmöglichkeiten als auch an einer machtreproduzierenden Solidarität rüttelt. Die beschriebenen Verwicklungsmechanismen spiegeln sich, wie im Beitrag aufgezeigt, auch in formalen und non formalen Bildungseinrichtungen wider und tragen zu einem Fortbestand rassialisierender Ausschlüsse bei.“ (Danquah/Egetenmeyer 2025, p. 230)

⁶ This text was written by the author and translated into English using DeepL. Original text: “If you translate your own text from another language into the language of the portfolio, please include a footnote referring to the original text. If you are translating entire paragraphs rather than individual sentences, you can insert the footnote at the end of each paragraph.”

8. Postal and electronic submission

Please fasten your written paper with a binder strip and place it in a simple cover, such as an envelope. Avoid elaborate bindings (e.g., folders or binders). Please print your written paper double-sided if possible. The paper must be submitted by the specified date (date of receipt).

- in **printed form** by post or by handing in to the post room of the University of Würzburg (Emil-Fischer-Weg 70, entrance on the ground floor on the right, 97074 Würzburg) or by dropping it in the mailbox of the Professorship for Adult and Continuing Education (Oswald-Külpe-Weg 82, 3rd floor, left, during the building's opening hours, usually until 6 p.m.)

and

- in **electronic form** in the "Portal International Master" on WueCampus under "Exams" for the respective lecturers. Please note that submissions must always be made in both file formats (PDF and Word document).

Please do **NOT** hand in the paper in person at the office of the Professorship for Adult and Continuing Education. Remember to put your name on the envelope as the sender.

If you send the paper by post, use the following address:

*Julius-Maximilians-Universität Würzburg
Professur für Erwachsenenbildung/Weiterbildung
Fakultät für Humanwissenschaften
Institut für Pädagogik
Name of the professor
Oswald-Külpe-Weg 82
97074 Würzburg*

First Name Surname
Street Number

Postal Code Place

Stamp

Julius-Maximilians-Universität Würzburg
Professur für Erwachsenenbildung/Weiterbildung
Fakultät für Humanwissenschaften
Institut für Pädagogik
Name Dozierende/r
Oswald-Külpe-Weg 82

97074 Würzburg

Please register for the exam on WueStudy on time. Late registration is not possible. Please make sure that you are registered for the correct exam.

Please refer to the announcement on WueStudy regarding the applicable exam submission deadlines for the Professorship of Adult Education/Continuing Education.

Please note that papers received too late by post or not uploaded to WueCampus by the deadline will be considered failed. The correctly completed declaration of authorship based on the Examination Office's current version must be submitted with a handwritten signature (see previous section).

Please upload your paper to the Adult Education Portal (Bachelor), Master International Portal (Master), or WueCampus course room (ERASMUS) as two single files (one PDF file, one Word file). You should find out in advance how to create your work in two single files (PDF and Word). The submission function closes at 11:55 pm on the submission deadline. Your submission will be considered on time if you upload your work to the WueCampus room within the specified period.

The submission of papers to guest lecturers and instructors who do not regularly teach at the University of Würzburg will be discussed separately in the respective seminar.

9. Compensation for Disadvantages

Students who have been granted compensation for disadvantages by the Examination Committee must contact the seminar instructor immediately after the start of the seminar – but at least 6 weeks before the submission deadline for the examination – to arrange an adapted schedule. For questions regarding the granting of compensation for disadvantages, please contact the Information and Advisory Centre for Students with Disabilities and Chronic Illnesses (KIS: <https://www.uni-wuerzburg.de/chancengleichheit/kis/>).

10. Illness/Inability to Submit the Examination

If you fall ill during the examination period and require an extension of the examination deadline, it is your responsibility to provide the examiner with credible evidence of your inability to sit the examination. To this end, you will need a medical certificate of incapacity to take the examination (*in German: Prüfungsunfähigkeitsbescheinigung*) issued by a specialist practice based in the Federal Republic of Germany. A certificate from a general practitioner will only be accepted in exceptional cases.

Please note that the decision as to whether the illness constitutes an impairment of your ability to sit the examination lies with the examiner. It is therefore not sufficient for a doctor to issue a certificate of incapacity to sit the examination. Rather, you must release the doctor from their duty of confidentiality as part of your duty to inform them, in order to obtain a certificate of incapacity to sit the examination containing the following information:

- Information about yourself, including date of birth and semester address
- Ideally, the designation of the illness
- Information on the impairment of performance and the symptoms of the illness
- Information on whether this constitutes a significant impairment of your performance capacity, or only a temporary performance limitation due to a daily condition (exam stress does not constitute an impairment)

- Information on the inability to sit oral and written examinations, including justification

The medical certificate of incapacity to take the examination (in German: Prüfungsunfähigkeitsbescheinigung) is usually issued in German by your doctor. Please submit the certificate to the examiner (personalised email address) for data protection. You will then, if applicable, receive information about the new examination deadline. If the examiner is absent, please contact: lehrplanung-erwachsenenbildung@uni-wuerzburg.de.

11. Pregnancy and Breastfeeding Students

Pregnant and breastfeeding women enjoy special protection under the German Maternity Protection Act and the Occupational Health and Safety Act. The relevant rules also apply to students.

It is advisable to provide formal information on this situation, so that the university can ensure the protection mechanism. Further information is provided on the website of the Faculty of Human Sciences: <https://www.hw.uni-wuerzburg.de/en/teaching-and-learning/pregnant-or-breastfeeding-students/>

12. Evaluation criteria and Grading

The evaluation and grading of your written assignment are based on the following criteria, depending on your level of study and study programme.

Grading of Bachelor students

1,0	excellent	Students address a clearly formulated and focused research question (or have a clear objective). They tackle this in a structured manner, taking into account the current literature on the subject. Their treatment of the research question demonstrates an original perspective. Key terms are defined and used consistently. The academic argumentation shows very few weaknesses, and there are no formal errors in the academic work (e.g. references, sources, and quotations).
1,3	Very good	Students address a clearly formulated and focused research question (or have a clear objective). They tackle this in a structured manner, taking into account the current literature on the subject. The treatment of the research question demonstrates an independent perspective. Key terms are defined and used consistently. The academic argumentation shows few weaknesses, and there are no formal errors in the academic work (e.g. references, sources, and quotations).
1,7 2,0 2,3	Good	Students address a research question or objective in a structured manner, taking into account the current literature on the subject. Key terms are defined and show only minor inconsistencies in their use. There are only a few formal errors relating to academic practice (e.g. references, sources, and quotations).
2,7 3,0 3,3	Satisfactory	The paper has a research question or objective and a structure for addressing them. The relevant literature has been taken into account, at least in broad terms. Errors in the methodology of academic work (e.g. references, sources, quotations) and in academic argumentation remain within acceptable limits.
3,7 4,0	Sufficient	The paper has a research question or objective and a structure for addressing it. The relevant literature has been taken into account in a clear and appropriate manner, at least in broad terms. Errors relating to academic practice (e.g. references, sources, quotations) and academic argumentation remain within acceptable

		limits.
5,0	Failed	Texts are written without a clear research question or objective, with little structure and/or without reference to the current academic discourse within the discipline. There are formal errors relating to academic practice (e.g. references, sources, citations) and academic argumentation.

Grading of Master's students

1,0	Very good/ excellent	Students address a clearly defined research question or objective. They approach this in a highly structured manner, taking into account the current literature on the subject. The work clearly demonstrates an original and critical perspective. Key terms are precisely defined and used consistently. The academic argumentation is very good, and there are no formal errors in the academic work (e.g. references, sources, and quotations).
1,3	Very good	Students address a specific research question or pursue a clearly defined objective. They approach this in a structured manner, taking into account the current literature on the subject. The work clearly demonstrates an independent and critical perspective. Key terms are precisely defined and used consistently. The academic argumentation shows no weaknesses, and there are no formal errors in the academic work (e.g. references, sources, and quotations).
1,7 2,0 2,3	Good	Students address a specific research question or objective. They approach this in a structured manner, taking into account the current literature on the subject, and formulate the research question from their own perspective. Key terms are defined and used consistently. The academic argumentation contains only a few weaknesses, and there are no formal errors in the academic work (e.g. references, sources, and quotations).
2,7 3,0 3,3	Satisfactory	Students have developed their own research question or objective. They address this in a structured manner, drawing on the current literature on the subject and incorporating their own perspectives. Key terms are defined and show only minor inconsistencies in their use. There are hardly any formal errors relating to academic practice (e.g. references, sources, and quotations).
3,7 4,0	Sufficient	The paper has a research question or objective and a structure for addressing it. The research question and structure of the paper still contain some acceptable weaknesses. The weaknesses in the literature reviewed are not particularly significant. regarding the literature and resources are not particularly severe
5,0	Failed	The texts are written without a clear research question or objective, with little structure and/or without reference to current discourse within the discipline. There are formal errors relating to academic practice (e.g. references, sources, and quotations) and in the academic argumentation.
